

## CDB Final Exam

Hello and welcome to the CDB final exam. Yes, you have made it. And the purpose of this video is to walk you through what you can expect over the course of your final exam process.

Okay, so here we go. It's a hundred questions, which is cumulative of the previous 11 modules that you've just got through, going through, if that makes sense at all. But congratulations for making it to this point. You do have a two-hour maximum time to take this exam with those 100 questions. If you do the math, that's more than a minute per question, more than ample time, right there.

Remember it's \$50 per attempt. So be ready for taking that final exam. By the way, we're not making a ton of money or really any money on these. We just want you to be prepared and that's why we have the \$50 per attempt.

And just like with the modules, you have to have an 80% or better passing grade on the final exam. And I know that you can do it.

So here are your steps. I just want to outline these. And I want to point out that right below this video, you see these exact same steps. So, step number one, you're going to watch this video. We can go ahead and check that one off right there. Step number two, you're going to read the proctoring information document that again is going to be right here. You're going to watch the what to expect and the 10 steps for test taker videos. That's a mouthful right there, that's step number three.

Download the final exam preparation document. Schedule your exam is step number five. Step number six is purchasing the final exam. This must be purchased before you can actually schedule it. And then step number seven, study and get ready.

Okay, because it's going to be awesome. You're going to get that first biggest thing out of the way when you become, when you pass, I should say, the final exam to the Certified Digital Bookkeeper. All right. I'll see you, get ready for your final exam and congratulations.
